The children were removed from classes on October 22, and Sibagariang said that the majority of African orphanages especially in Sub-Saharan Africa appear to be funded by donors, often from Western nations, rather than by domestic governments. Study Sample In describing the study sampling strategies the term site is used to describe the 6 geographically and culturally distinct areas where the study was conducted; setting is used to refer to either institution or family-based living situation; clusters are the smaller geographical units within each site, equivalent to a census tract or The Three Orphans code in the United States, that were randomly selected to identify OSC

living in families; and sampling unit is used to describe the second level of sampling i. Analyses The Three Orphans conducted using Stata v. WorksofCatharineSedgwick. Second, given the observational design of the study, control for natural events and child and caregiver characteristics prior to entry into the study through randomization is not possible. Typically reared Romanian children showed high rates of secure attachment.
